PAR-Q and You

(A Questionnaire for People Aged 15-69)

Regular physical activity is fun and healthy, and more people are becoming more active every day. Being more active is very safe for most people. However, some people should check with their doctor before becoming much more physically active.

If you are planning to become much more physically active than you are now, start by answering the seven questions in the box below. If you are between the ages of 15-69, the PAR-Q will tell you if you should check with your doctor before you start. If you are over 69 year of age, and you are not used to being very active, check with your doctor.

Common sense is your best guide when you answer these questions. Please read the questions carefully and answer each one honestly. **Circle YES or NO.**

- Yes / No Has your doctor ever said that you have a heart condition and that you should only do physical activity recommended by a doctor?
- Yes / No Do you feel pain in your chest when you do physical activity?
- Yes / No In the past month, have you had chest pain when you were not doing physical activity?
- Yes / No Do you lose your balance because of dizziness or do you ever lose consciousness?
- Yes / No Do you have a bone or joint problem that could be made worse by a change in your physical activity?
- Yes / No Is your doctor currently prescribing drugs (for example, water pills) for your blood pressure or heart condition?
- Yes / No Do you know of any other reason why you should not do physical activity?

If you answered YES to one or more questions, talk with your doctor by phone or in person BEFORE you start becoming much more physically active or BEFORE you have a fitness appraisal. Tell your doctor about the PAR-Q and which questions you answered YES. You may be able to do any activity you want-as long as you start slowly and build up gradually. Or, you may need to restrict your activities to those that are safe for you. Talk with your doctor about the kinds of activities you wish to participate in and follow his/her advice.

If you answered NO honestly to all questions, you can be reasonably sure that you can:

- Start becoming much more physically active-begin slowly and build up gradually. This is the safest & easiest way to go.
- Take part in a fitness appraisal-this is an excellent way to determine your basic fitness so that you can plan the best way for you to live actively.

Even if you answer NO to all questions, you should delay becoming much more active:

- If you are not feeling well because of temporary illness such as a cold or a fever – wait until you feel better.
- If you are or may be pregnant – talk to your doctor before you start becoming more active.

Please note: If your health changes so that you then answer YES to any of the above questions, tell your fitness or health professional. Ask whether you should change your physical activity plan.

Informed Use of the PAR-Q: The Canadian Society for Exercise Physiology, Health Canada, and their agents assume to liability for person who undertake physical activity. If in doubt after completing this questionnaire, consult your doctor prior to physical activity.

I have read, understood and completed this questionnaire. Any questions I had were answered to my full satisfaction.

Personal Training Contract/Agreement

In order to maximize progress, it will be necessary for you to follow program guidelines during supervised and (if applicable) unsupervised training days. Remember, both exercise and healthy eating are important. It is unlikely for exercise to compensate for a poor diet.

During your exercise program, every effort will be made to assure your safety, however, as with any exercise program, there are risks, including increased heart stress and the chance of musculoskeletal injuries. In choosing to participate in this program, you agree to assume responsibility for these risks and waive any possibility for personal injury. You also agree that you have no limiting physical conditions or disability that would preclude your participation in an exercise program.

A physician's examination is recommended for all participants. Personal training participants who do NOT have a prior physician examination MUST acknowledge they have been informed of its importance, which is evidenced by your signature below. By signing below, you accept full responsibility for your own health and well-being AND you acknowledge an understanding that no responsibility is assumed by the leaders of the program. You also agree to release and hold harmless Health Quest Fitness Consultants, L.L.C. and Evans Rehabilitation Services, L.L.C. as well as their agents and assigns from any and all injury or damages which may occur as a result of your participation in this program.

Personal Training Terms and Conditions

1. In order to be considered an "early cancellation", our staff must be notified at least 24 hours prior to the scheduled appointment time.
2. "Early cancellations" for members of group training sessions will require a price adjustment based on the applicable rate for the number of clients present for that session.
3. Clients arriving late will receive the remaining scheduled session time, unless other arrangements have been previously made with the trainer.
